Experience

DevsNest LLC

Shaymoli, Dhaka, Software Engineer (Intern)

April 2023 - Present

- Built Shopify apps and extensions using JavaScript and React
- Built front-end websites using the same tech mentioned above which are used by thousands of Shopify merchants
- Collaborated with other highly experienced developers to make the website robust
- Performed coding, testing and maintenance

Projects

Hired Dream Job (Team Project)

A platform for managing career. A single place where job candidates and employers can find jobs and employees respectively

Source: Live: hired-dream-job.vercel.app | Git: github.com/strong-web-cooderzz/hired-dream-job

Features

- Candidates and employers can search for jobs, employers and candidates respectively. Employers can post and update jobs. Candidates can apply to those jobs and employers will get notification in real time.
- Both types of user can update their profile and candidates can post blogs to showcase their skills.

Contribution

- Used MVC architecture to design this huge project. Also used MongoDB aggregation to reference data.
- Used Socket.io to notify users when someone applies to their job. No custom token used, only firebase to ensure top security.

Technologies: React, React Router, Firebase, NodeJS, ExpressJS, MongoDB, Socket.io

Your Book

Used book reselling e-commerce website

Source: Live: your-book-2022.netlify.app | Git: github.com/abhsn/your-book-client.git

Features

- Buyers can book items and can pay for their booked item
- Items are categorized according to different category
- Sellers can advertise their items. Different dashboards for admin, seller and buyer

Technologies: React, React Router, Axios, Tanstack Query, React Hook Form, React Hot Toast, daisyUI, Firebase, JSONWebToken, NodeJS, ExpressJS, MongoDB

Service Review

Service reviewing website for personal photography

Source: Live: service-review.netlify.app | Git: github.com/abhsn/service-review-client.git

Features

- Logged in user can add, edit, delete their review
- All users are verified using JWT
- User can add services

Technologies: React, React Router, Firebase, JSONWebToken, Node.js, Express.js, MongoDB

Education

BSS in Economics

Dhaka College

2020 - 2024
